

My name is Austyn Dolce and I live in Glastonbury, CT.

I fully support HB 5707 because the use of Beagles in laboratories is inhumane, gruesome and torture for these innocent animals. Using Beagles in laboratories is legalized animal cruelty. Even when Beagles have a chance to live, they are still euthanized even though they could simply be released and given a chance at life. In addition, they are so severely harmed during laboratory testing's to the extent of losing eyes, limbs and becoming disfigured. These animals have the right to be free of this vile torture, and the Beagle Freedom Bill will save and change the lives of innocent Beagles.

Thank you
