

To Whom it May Concern,

I am writing this in support of bill HB 5707, The Beagle Freedom Bill, seeking to secure the freedom and rescue of animals used in laboratory testing.

I believe this is a very important bill, because all animals deserve a chance to be with a loving and caring family. These animals have known nothing but life in a cage and the cruelty of being experimented on. We owe it to these poor animals to give them a life after lab testing.

Please support this important bill!
