

I am opposed to this Bill HB 5709. Any money spent on keeping water clean in CT is worth it. We've been a leader in cleaning our water for a long time.

Do NOT exclude small municipalities from the DEEP permitting laws. They can pollute too and must be included. Even little pollution pollutes and can add up to big pollution.

This law is NOT good for clean water in CT. Please do not let it get out of the Environment Committee.

Thank-you
