

Dear members of the committee my name is Mike Papa from Stamford ct I support a more creative strategy in the storm water & sewer management, allowing PEOPLE to work in collaboration with local ,state and federal government . A CONSTRUCTED WETLAND on private property are considered "earth kidneys" . If the government offer TAX incentives PEOPLE will collaborate on this extremely important strategy we all need for our future generations of people to benefit . Connecticut can develop the best FISHING INDUSTRY in America if we keep the sound clean . Sincerely Mike G Papa. Stamford ct.
