

I am writing in support of HB-5733. Connecticut is greatly impacted by the burning of fossil fuels in states west of us. For the long-term protection of our environment and the health of our citizens, it is critical to divest from fossil fuels. This sends a clear message to government and corporations that it's past time to move to cleaner energy sources.

Connecticut has the opportunity to take the lead and set an example for other states to follow.

Thank you for considering my views.
