

I was pleased to learn that a bill has been introduced to ban plastic bags in the state of Connecticut. All the reading I have done strongly indicates that single use plastics are clogging up waterways, killing birds and other animals and, plastic bags in particular, jam up recycling equipment. I support reducing plastic bag usage and hope that the legislature will support this bill. This will be a bold move making Connecticut a leader in moving toward more sustainable options for consumers and the environment.

Sincerely,

Monica Keady
