

Dear Legislators,

Please support Senate Bill 366. The greatest issue facing our state, nation, and world is saving the earth for human habitation as well as other creatures and plants that we depend on for life. Pesticides affect not only what we call "pests" but all life. These are killers. Why would anyone want to put pesticides on playing fields? Pesticides also get into our water supply. For your sake, my sake, and for the sake of children in Connecticut, please vote to keep pesticides off playing fields,

Sincerely,  
Dorothy Lovett Buckley
