

April 26, 2015

Dear Senator John W. Fonfara, Representative Jeffrey J. Berger, and Members of the Finance, Revenue, and Bonding Committee,

We the undersigned urge you to pass H.B. 6840, AAC Investments in Connecticut's Transportation Infrastructure.

The bill would allow the state to maintain its existing transportation infrastructure while providing much-needed improvements to our roads, bridges, bus, and rail systems. Transportation affects the lives of everyone that lives in and travels through Connecticut and an improved transportation system is critical to the state's economy and environment. There is no time to waste!

Connecticut residents, businesses, workers, and visitors deserve a reliable transportation system that moves people and goods on time, every time. The time to act is now for safe and efficient transportation in Connecticut. Thanks for your support.

Sincerely,
