

Hello,

I have a child with Special Needs and am also a Nurse Practitioner who works with people with ALS (Lou Gehrig's) disease. Unless you have had experience with people who need therapies (my wonderful Aetna does not cover any kind of OT/PT/ST at all), a myriad of doctor's appointments, medications that often are not covered, special equipment, you can't imagine how burdensome all these expenses can be. Just having a way to use your own money for such expenses, without having the money taxed first, would make an incredible would decrease hardship and mean that my daughter, and many disabled people, could get more of what it is that they need.

Please Sign Gail Lavielle's Bill HB 7038 which would allow one to establish a tax free account for disability related expenses.

Thank you so much,
Regina Youngman, APRN
