

To Whom it May Concern,

Let it be known that I strongly oppose the addition of Keno gambling in our state.

Those who are most apt to participate in the purchase of this type of “game of chance” are the very people who can least afford it.

Additionally, the state currently has numerous lottery and scratch tickets available for purchase to those who wish to offer their “disposable income” to supplement this states’ coffers.

**The Connecticut State Legislature would better serve its’ constituents by directing their efforts at reducing spending, rather than increasing income.**

An appreciable reduction in spending would act to serve *ALL* Connecticut residents.
