

To all those who make decisions on behalf of Connecticut residents,

I am opposed to changing the dynamics of revenue by adding still more gambling via Keno. It will only augment the need to increase the services for those who are addicted to gambling and those who are also affected by the loss of that money. In other words, more problems will result, more lives ruined, and more expenditures for help and protective services. Please vote against and work against any more increase in gambling in this state.

Thank you.

Judith Ruhm
