

CT Legislature, I would like to register my opposition to to any measure of adding Keno as legal in CT. Unfortunately it seems that many in the House want to generate revenue for the state from those most likely that can afford it. I think we all know that the majority of citizens that participate in gambling such as Keno are certainly not in financial position to do so, however they are drawn to it by the possibly of changing their economic situation, in many cases it only places them further behind.

I realize that our State is in desperate need of revenue, however the most effective way to generate additional revenue would be by stopping the continual spending and drain on our citizens via the outlandish cost of Government in the State of Ct. In the long run any additional revenue from Keno will not really help our situation in the State. Stop wasting money as our CT Legislature has continued to do if you truly are concerned.

Sincerely,

Michael Pifer
