

A good quote to remember regarding HB 7054 and any other related gambling considered for Connecticut is that GAMBLING "the sterile transfer of money or goods, CREATING NO NEW MONEY or GOODS'!!

Listen to some of the studies from a Connecticut university, WCSU, and others noting casinos and other forms of gambling "drain wealth from communities, weaken near by businesses, hurt property values, reduce civic participation, family stability and other forms of social capitol", (Hartford Current op-ed page 4-21-15).

Just look at what has happened to Atlantic City and its gambling enterprises!

Instead of looking at some supposed 'easy' way to raise revenue, spend the time to look at WHY 'spending and debt and a negative business climate' exists in Connecticut and DO SOMETHING ABOUT IT!!!
