

As a Greenwich resident I am opposed to House Bill 7054. Information on the bill has not been made available: for what individuals has it been designed? What are the pros and cons of marketing to this group? What amounts are anticipated? What other states offer Keno gambling? What has been their experience?

Seeking additional revenues need careful analysis and whatever is proposed should pass the test of responsible financing. If a proposal is for another form of gambling and preys on the poor our legislature should think twice before acting.

Yours sincerely,

Stuart Reider
