

I am definitely against Senate Bill #946. As a senior citizen on a low fixed income any additional state taxes will take away our food money. In order to stabilize our present health conditions, we have to use some over-the-counter drugs that used to be prescriptions. The sales tax on those, along with vitamins that our doctor's say we need, have taken away more of our spendable money. Having been diagnosed in 2002 with non-Hodgkins lymphoma stage 3 with 6 months to live, the resulting 6 month round of chemotherapy and co-pays totally decimated my husband's retirement funds. He also was very ill with congestive heart failure during my recovery. Needless to say we don't have any additional funds to fall back on if state tax increases continue. It is time to take overtime out of municipal and state union pensions.
