

To Whom It May Concern:

I am writing to state my opposition to Governor Malloy's proposal to eliminate funds from the Community Investment Act account . The Community Investment Act has provided funds to Connecticut communities to preserve open space and has accomplished a great deal to preserve the state's beauty. This is a very short sighted proposal which should be voted down. Funds for the Community Investment Act should be kept in the budget. Look for wasteful spending in other areas, not in this account. Also, cutting back on funds for state parks which serve all citizens should not be allowed.

Thank you for your consideration.
