

I'm in favor of eliminating the sales tax for items under 50 dollars. I do alot of retail therapy shopping and support CT's economy every week. The tax adds up. Tax free week in the summer is really of no consequence to me as I usually do not purchase items in excess of 50 dollars. For those items that I do purchase, it would cost more in gas to go back during that week as opposed to purchasing when in the area.
