

The Governor is proposing to empty the bank account of the most important source of land acquisition money, the Community Investment Act fund.

In the last two grant cycles alone, 57 communities have received funding through the Community Investment Act -- for trail access in Stamford, drinking water protection in Meriden, endangered species protection in Glastonbury, community gardens in Bridgeport and Norwalk, and on and on.

This is just not acceptable. Once the funding is gone it is gone. It will be very difficult to reverse his decision and the damage that will be created. Please do not let this happen!! In a world where there is so much hate and bloodshed, let's come together on these beautiful bright spots we can share here in Connecticut and save them!!! We all need them!!!

Thank you,
