

I will make my comments short and direct. NO MORE TAXES!! The State Legislators need to address the burdens on the people of CT from the already over taxation. This pattern by which office seekers promise without restraint and the electorate blindly pursue the belief that you can have anything simply by voting for it. The well is running dry. We are over taxed and the opportunities to afford basic human needs continues to decline. It is time to change this course and actually represent "the best interest" of the citizens of CT.

Sincerely,
Kathy Prudden
