

My wife Mary Jane & I
are against increasing

Any Connecticut taxes. In the almost 20 years we have lived in Connecticut, taxes on all levels have increased almost every year. New taxes have been added almost every year to the point where Connecticut is one of the highest Taxed states in America thus pushing Corporations away from investing in our state and creating jobs. More and more individuals are leaving CT for FL as they reach retirement age.

I am on the Board of Greenwich Hospital and a New Tax is being created to stunt the growth of the hospitals and increase costs to patients.

I am also on Board of Shelter for the Homeless in Stamford. I want to help support the poor and unfortunate And make them self sufficient. Throwing more money at a problem without offering education and training is not the proper route to success.
