

To whom it may concern,

I believe that the State of CT should not invest directly with this project. The owners started this project with no expectations that the State would offset any costs I'm sure they are aware of the risk and reward of new ventures. I believe providing assistance to current small businesses in the area would go farther. Providing tax benefits for expanding businesses to accommodate the increased services required would be best.

Thank you.

I remain,

Victor Nigro Jr
