

My name is Marcea Koffsky and I live and vote in Norwalk, CT. I would like to express my support for **SB1085**. The insurance gap for behavioral healthcare affects equity, access and quality of care for residents of the state of CT.

We can talk about the need for mental health care. Without the insurance coverage behind it, the talk is just talk. The Sandy Hook Commission released their report. Will there be funded programs and insurance to cover the mental health services deemed necessary to try and prevent another such atrocity? Or will it be just another report?

Please find the guts. Please find the funds. Behavior health care is critical to the well-being of our citizens, or economy and our state.

SUPPORT SB 1085
