

**Judiciary Committee Testimony for public hearing on 03/11/2015**

RE: **HB-6962** (An act concerning firearm safety)

I oppose this bill because it places responsibility for criminal activities upon people who did not commit the crimes and are likely the victims of crime themselves. This would seem to be a very twisted logic. In addition, the whole idea of a defensive firearm is that it is readily accessible when needed. I believe that the current safeguards against unauthorized access are sufficient and should not be changed in the way that this bill proposes.

Thank you for taking the time to read my comments.
