Good afternoon,

My name is Jessica Wing. I live in Oxford, CT I would like my opposition to Bills 650, 6848, 6962 to be known.

There are currently many firearms laws on the books, that infringe far too much on law abiding citizens rights. There is no need to infringe further.

As far as Bill 6962 is concerned. That is overstepping the Government's boundaries, and coming into our homes. We have a right to our privacy, and to store our belongings as we see fit. If someone, anyone, comes into our homes and takes something they should not, be it a firearm or another object, than the person who took the object (or firearm) should be the one punished.

As to Bill 650. If someone is arrested, or has a restraining order against them, than their firearms are already confiscated. I see no reason to broaden the scope of this law. It makes it far too easy for people to make false claims. It also makes it far too easy for someone, who has no proof against them, to lose their Second Amendment Rights.
