Subject: Assisted Suicide Bill # 7015

In reference to Assisted Suicide Bill #7015, there is a great disservice that will be done by having doctors offer death as a health solution.

The physician's Hippocratic Oath had been with us since early days. It stated, unambiguously, do no harm. When it becomes policy that doctors may kill patients, it is no longer a "do no harm" situation.

It is the national policy now of the U.S. that people have access to health care. Killing for any reason is not health care and I am against this Bill.

Thank you. Philip Fecher, 131 Jonathan Drive, Stamford, CT 06903
