Subject: written testimony OPPOSING HB 7015

My name is Tracey Kelly. I reside at 363 Union City Rd. Naugatuck, CT

I am writing today to convey my OPPOSITION to HB 7015 "An Act Concerning Aid in Dying for Terminally Ill".

Regardless of the many "talking points" presented on both sides of this issue in order to be *politically correct*, none of them have the ability to shade the reality of this bill, which is *the legalization of yet another form of murder*.

How we have gotten to this unfortunate state in our society, that murder is an acceptable response to pain, is no surprise to us who have watched this Culture of Death develop over the past 50 years. Yet as the saying goes "Just because we can, doesn't mean we should"

Life is sacred. Created by Our Creator, God. It is He alone who decides when our life begins and ends. Anything else is simply wrong. It is against Natural Law to kill your young, your unborn, your elderly, your diseased and "yes" your terminally ill.

Its just not our place or our right to do so.

My brother recently assisted in the death of his wife, in a state that assisted suicide is not yet legal. He and she bought into the "burden" and the "compassion" lies that abound in our society. I do not know the state of my sister-in-laws soul, but I pray that she turned to Our Lord and begged for His Mercy and Grace before she died.

As for my brother, his regret for her murder has been more than he can bare...and he is broken, desperate and empty; a shell of the man he was before this, before he bought into the lies, My brother can't fix this, there is no "do-over" for this mistake. Murder is after all, irreversible.

Please consider this Bill with the strings of your heart and your conscience, not with any politics strings or trappings.

God Bless us and God have Mercy on our state of Connecticut.

Respectfully,

Tracey E. Kelly
