Subject: Aid In Dying

To Judiciary Committee Members:

I am a resident of Connecticut and I understand that this is a "free country". It seems to me that if I have any freedoms at all they should certainly contain the freedom of control over my own body. I am 83 years old and in good health. However I know that this will not last forever. When the time comes I demand the right to dictate my own choices as to what actions to preserve my life or let it go will be taken. I see no reason why my body should be controlled by your beliefs, morals or standards. To the Committee I say "keep your hands off". Please vote accordingly.

Thank you,

Bert Krauss
