Subject: Opposition to HB7015 re. Assisted Suicide

Dear Members of the Judiciary Committee:

We are submitting testimony in OPPOSITION to HB 7015 and any laws now and in the future that embrace "assisted suicide." In the spirit of Margaret Sanger, the mother of Planned Parenthood, her true intentions were never revealed until after the fact -- that is, that she actually wanted to reduce the black population. And we feel there are severe consequences to HB-7015 that the citizens of Connecticut won't realize until it's too late.

We are opposed to any and all assisted suicide language in laws. We are confident that the other testimonies will support this. HB7015 is a faulty bill that is presented in a benign way Its passing would be exploited, expanded and do great harm.

Sincerely,

Phil and Mary Liquori
North Haven, CT
