Subject: HB-7015

After being primary caregiver for my father during his last, painful, excruciating humiliating weeks of pancreatic cancer, I implore you to SUPPORT HB-7015 and give dignity and control of their disease to those who suffer most: the patients.

(I will not be attending the pubic hearing to testify, as I have attempted to in the past, and was humiliated and ridiculed, beyond compare until far past midnight. The public hearing protocol needs its own hearing to remedy this.)

Thank you.
