

Hi, I'm an immigrant and I have lived in 2 countries, Spain and now the USA. It would be most devastating being deported because not only do your dreams get shattered and your goals go unaccomplished because I would no longer be able to secure a future for my wife and children, but also because I'm the only provider in the house and I'm very attached to my family.

We are citizens of the world so there shouldn't be so many hurdles to live here. The world belongs to all living things so knocking down barriers is the right thing to do. Please start by supporting HB 7039.

Thank you

Byron Lopez
