

SB 650 and HB 6848 blatantly violate Constitutional due process and will be subject to future judicial scrutiny. Like it or not, "probable cause" is still required for police stops and searches in this country. HB 6962 infringes upon the right to "keep and bear arms" within one's own home by mandating the purchase of an expensive safe in order to exercise that right. It is therefore the equivalent of a "poll tax" on the Second Amendment rights of the economically-disadvantaged. Violations of a so-called "Safe Storage" law would result in a disproportionately larger number of arrests of poor and minority citizens, just as the ban on high-capacity (over 10 round) handgun magazines does presently.
