

I support SB-1129

My thoughts on the Early Release Program, as it presently states, are not very favorable. There has to be several more criminal acts that should be added to the list of violent crimes that are not eligible for this program. All murders, rapists (including incest rapes), home invasions, violent assaults are only a few to consider. Please make our society a safer place to live in where we are not always afraid to walk alone, drive alone or live alone. Thank you.
