Subject: Senate Bill 1129

Please support and pass Bill 1129. People who are in prison for committing violent crimes should not be released before the end of their sentence. Someone suffered because of what they did. If these prisoners have hurt others they should not be let out among us again to hurt someone else. Life is dangerous enough without freeing known dangerous people. Who's going to repair the hurt and be responsible if these people hurt a mother, father or child. A court and/or jury found them guilty of a serious crime and they should be required to finish their sentence. Thank you.
