Subject: Senate Bill 668

Hi,

I'm a supporter of this Bill. This SHOULD be a choice to individuals.

We allow the most humane treatment and passing of our very sick pets, yet our government dictates we shouldn't allow the same for ourselves? This is ridiculous.

I have watched my parents and friends forced to live face the long struggle with terminal diseases without the ability to choose to end it peacefully on their own terms. We are talking about intelligent people who need the ability to choose. It is NOT a dangerous precedent to set. Why should we all be forced to live months on hospice and on drugs, unable to live the quality of Life WE want?

PLEASE take the appropriate step to give us this choice. It's the RIGHT thing to do.

Lawmakers need to stay out of our personal lives and let us make a choice on how WE want to live when faced with a terminal illness. This isn't YOUR life, it's OURS.

Let us make the choice!

Best Regards,
Linda
