Dear Representative Grogins,

My name is Patti. Until 2011 I lived in a dangerous city about an hour from Philadelphia. The neighborhood I lived in was especially bad for guns. In the mid 2000's a bullet was fired into my home just missing my head by three feet. In 2010 a shootout took place at my apartment building off a porch just about twenty feet above my head. The latter took a huge toll on me. I suffer from frequent nightmares about being shot at and depression. Thank you for all you are doing to help curb gun violence. No one has the right to do this to another human being and no one should have to spend their lives trying to pick up the pieces. The main shooter in the shootout used a semi automatic. He fired twelve shots in about five seconds. These experiences will forever be burned into my mind. Please keep working to keep this from happening to even one more person. No law will stop gun violence completely but if even one life is saved. If one person is spared the kind of pain myself and others go through then it is worth the effort.

Sincerely,
Patti Brown
