

Dear Senator Gerratana

Dear Representative Ritter

My name is Constance Frishman and I have been a licensed electrologist as well as a Certified Professional Electrologist (CPE) for the past 30 years. Additionally, I was in the very first group of electrologists to take and pass the professional examination to earn the CPE designation.

I obtain CEUs annually to maintain my CPE as well as to enhance my professional skills. The above referenced bill is completely wrong and will do nothing but put out of business hundreds of hard working entrepreneurs dedicated to professionalism and superior customer service. I urge you and your committee to change the bill to exclude electrologists.

Sincerely,

Constance Frishman, LE, CPE
