I am disgusted and ashamed of what this State is trying to do To a business that has been around since the 1800's.

That's why so many are moving out!!!!!!

There must be doctors that need our business too!!!

What a shame.

In my over 23 years of business in the Hartford area I have helped So many people that can't afford lasers . Laser is not permanent But what we do is. We can all work together. Are we a threat to these Doctors? Is money talking again in this State!

Many people I work on won't even leave their homes because of their hair Problems. We help in a way Drs can't .

This bill should never have been invented!!!!

Jan M Licitra

Glastonbury

Ps I have worked on and finished clients of their hair problems

With the Rep that started this bill! They were very very happy too!
