

**5625**

My name is Kelly Francisco and I have been doing electrolysis for 24 years, this is my career in which I am very proud of and have many clients that this bill would effect, as well as those who do this for a career.

Electrolysis is safe and very effective and has been around for over 100 years. Connecticut has very high standards and as the Electrologist we follow the standards in addition to continuing education. Please do not take our ability to continue our careers.

Thank you  
Kelly Francisco
