

Hello,

My name is Gabriel Benson and I am writing the email in support of HB5915. I have had very positive experiences with homeopathy throughout my life and would like for other people to be able to have the same opportunity. I have been treated several times with homeopathy throughout my life with great success but the most impressive story to me should hopefully shed some light on why I feel others should be able to have it as an option.

In high school I broke my leg rather severely playing football. I had compound breaks in my fibula, broke my tibia and 3 places and also broke my foot. After the surgery I got a pretty bad leg infection. It got bad enough that they were treating with several things, i cant even remember exactly what. (Probably antibiotics and steroids) Things were not progressing well and my doctor wanted me to check back in the hospital to have it treated. At that point I couldn't have really afforded to miss much more school than I already had so it was a stressful situation. Given that lack of progress with their treatment and facing the potential of more of the same in the hospital I elected to give homeopathy a try for a few days to see if it could mitigate the infection. My experience was fantastic and the infection quickly subsided allowing me to not miss more school or have to reenter the hospital. I have had numerous other positive experiences with homeopathy and feel strongly that other should have the opportunity to do the same through a legitimate licensing process that allows people to seek professionals out for their care.

Gabriel Benson
