

Michael Beale
HB
5915

Hello, I am Michael Beale, I'm 17 years old and I live in the great town of Wallingford, CT. I'm emailing to put my_full support behind Raised Bill 5915: An Act Concerning the Practice of

Classical Homeopathy. I advocate for this bill because homeopathy is safe, affordable, and it exercises health freedom.

Safe: Natural medicine has minimal side effects unlike mainstream drugs, and *no scientific study has proven homeopathy to be harmful to the human body.*

Affordable: Typical treatment for homeopathy is far less than expensive pharmaceuticals which puts money back in consumers pockets to invest elsewhere in the economy.

Health Freedom: Citizens have the right to choose where and how they want to get their medicine. The only reason not to have that choice is if the drugs are harmful and the government needs to protect the consumer. But homeopathy is proven not to be harmful, and citizens of Connecticut have the right to choose how they want to be healthy.

A healthier population is a better population. I ask you to put support behind Raised Bill 5915: An Act Concerning the Practice of Classical Homeopathy.

Thank you very much,
Michael Beale
