

HB 5915

To Whom It May Concern:

I am writing to support the bill to allow Homeopaths with a Certified Classical Homeopath certificate the ability to practice homeopathy in the State of Connecticut. I personally have had a very positive experience with homeopathy specifically in dealing with allergies (which used to be seasonal but unfortunately now appear year round) and dealing with excessive pain due to oral surgery. I have a wonderful medical doctor, however I would appreciate the opportunity to have a qualified homeopath professional offer solutions which compliment conventional medicine. I urge you to change this law from 1893. It seems silly that I have to search for homeopathy professionals in Massachusetts or Rhode Island when they should be allowed to practice in Connecticut (which is the only state in the country that has this restriction). I want to see more highly qualified homeopaths practice in Connecticut. Thank you for your consideration.

Sincerely,

Wendy DeLisa
