

I am in support of HB 6709

I have been in charge of my destiny as long as I can remember I have been in charge of my own destiny The right to succeed, the right to live my life well in the bounds of the law and my religion and my own health. After making my own decision on how to live and picking a choice on how to proceed it makes me think why don't I have the right to choose between one phase of my life with in another. No lawmaker was there saying no to that extra credit card or a person elective medical procedure. Why can't we have the right with proper information to try what we as individual see what might be our last chance to survive or ultimately being able to fully say I did every thing possible to survive and not blame the government on tying my hands on making a decision that would affect me and my family.
