To Whom It May Concern:

What a great country we live in that we have freedom of choice to choose how we live. As a parent of 2 children and another soon to be born, I have the liberty granted by our government to raise them in a manner that I and my husband believe to be best suited for our family's needs. This includes the use of Naturopathic Medicine as our primary source for medical needs.

In my own experience with Naturopathic Medicine I have found solutions to health problems that a Medical Doctor said could only be solved by surgery or by constant returns to prescriptive drugs. Instead of surgery, I was able to remedy my issues via "drainage" and "homeopathy", just 2 modalities of Naturopathic Medicine and have since found those health problems cured.

Our children are raised in the same manner as ourselves, and therefore primarily attend to a Naturopathic Doctor for illness and well visits. However, because of the law, we've had to spend 2 visits for every doctor visit, whether it's a physical or a blood test. Just imagine going to see your trusted doctor who gives you all you need in diagnosis of an illness, then having to go to a clinic or another doctor to get the medicine you need. Not only is this difficult on the ill child, but also exposes many more people to the germs of a sick child and is an expense to families and Insurance Companies.

I ask you to please pass this bill to allow Naturopathic Doctors to have Prescriptive Authority in the State of Connecticut.

Sincerely,  
Andrea Bargabos
