I am and have been a patient of naturopath and acupuncturist Robin Ritterman of Hamden for many years. She has helped me with complex issues of paraplegia, MI, TM, APLS/clotting disorder...in coordination with my osteopathic and medical team. Her insights and treatments have been invaluable. She understands medication issues as well as my other physicians and should be able to work with medications with her patients. She has been conservative rather than aggressive in her treatment, and her input has been invaluable to my medical team.
