

6797

As a patient of a naturopathic physician I strongly urge your support for Bill #6797; the naturopathic physician needs this authority to better serve their patients. We then would not have to keep going from an M.D. to the N. D. They are much more conservative in their use of drugs and would not give patients something they didn't need just to "cover all the bases" as I was once told then given an antibiotic that was totally unnecessary. PLEASE support this bill. Joan Q. Zurolo Hamden, CT.
