Dear Public Health Committee Administrator,

I have been going to a Naturopathic Physician in CT for eighteen years. My doctor is phenomenal and she has helped me through many health issues over the years. I rely on her guidance for all my health issues and she has done a wonderful job in keeping me healthy. I am very healthy because of her advice on prevention and life style changes. I go to my naturopathic doctor all the time and only go to my medical doctor if I need a prescription.

Please allow Naturopathic Physicians the ability to prescribe medications in CT. Other states allow Naturopathic Physicians the ability to prescribe medications. It's now time for CT to update this bill and give the Naturopathic Physicians the ability to write prescriptions.

Thank you,

Nancy Sweetman
