

6797

I, The Rev. Dr. Molly O. Loudon, write to support your legislating that Naturopathic Physicians have the right to write prescriptions when they deem that prescription medication would help their patient to,heal.

I am a patient of both an MD and an ND. I have had a condition where I needed the help of both to,heal. Often allopathic(MD) medicine runs out of ways to help people. What, then is most helpful,is what Naturopaths can provide. Without authority to write prescriptions, the full effectiveness of naturopathic medicine is limited. And it leaves patients running between their Doctors. That is expensive and can be confusing for,the patient.

And honestly there are areas of good medicine in which NDs are better trained.

Thus your support of House Bill 6797 would improve availability of good healthcare in Connecticut, and make our State more current with modern trends in medicine.

Thank you. The Rev. Dr. Molly O'Neill Loudon, District 7, West Hartford
