

6797

I am a patient of a naturopathic physician and have found the naturopathic medical approach to be personally beneficial as it allows me to combine the traditional medical approach with the natural.

I ask your support to allow naturopathic physicians ("NDs") the same prescriptive authority consistent with many other states that license NDs.

I would like to receive regular primary care from my ND which would not only save me time, but be more comprehensive and efficient.

Please support providing prescriptive authority to NDs.

Thank you.
