

6797

Good day-

I am a cancer patient seven years post a rigorous course of chemotherapy for an advanced stage of colon cancer. During that eight months of necessary medical protocol I was fortunate to be under the care of an amazing team of naturopathic physicians at the University of Bridgeport. Most patients undergoing the treatment I had are faced with hospitalizations, need for multiple medicines to boost blood levels etc. I sought natural supplements to SUPPORT the medical drugs that I needed and made it thru with relative ease. My medical doctor was kept aware of what the ND who I worked with had suggested taking. When he saw how well I was tolerating the tough treatments his response was "just keep doing what you are doing".

It is so imperative that the bill HB6797 adds drug authority language for CT NDs and support this effort to make drug authority a reality for CT NDs.

Sincerely-

Sue Donegan
