Hello, My name is Terese Biega and I am a patient of a naturopathic physician ( N.D.)

I believe in the naturopathic medical approach to healing. I am asking you to support and allow our naturopathic physicians the same authority to prescribe medications to their patients. Other states already allow their Naturopathic physicians to write prescriptive medications.

I only want to see my own N.D. This would help a lot of patients, such as myself, from bouncing back and forth between doctors. It would save us money, time and a lot of aggravation too.

Thank you for listening to all of us. Again, I ask for your support to let our N.D.s have the authority to write out prescriptive medications.

Thank you,

Terese Biega
